Changes to the GHS Labels and Pictograms

The Globally Harmonized System of Classification and Labeling of Chemicals (GHS) is a system for standardizing the classification and labeling of hazardous chemicals used in the workplace. The GHS takes a comprehensive approach to:

- Defining health, physical and environmental hazards of chemicals.
- Creating classification processes that use available data on chemicals for comparison with the defined hazard criteria.
- Communicating hazard information, as well as protective measures, on labels and Safety Data Sheets (SDSs).

This flier will help you better understand changes specific to labels.

Labels

OSHA has updated the requirements for labeling of hazardous chemicals under its HCS. As of June 1, 2015, all labels will be required to have pictograms, a signal word, hazard and precautionary statements, the product identifier, and supplier identification.

There are several new label elements:

- Pictograms Pictograms on labels consist of a symbol on a white background framed within a red border.
- Signal Words These are used to indicate the severity of the hazard and alert employees to the potential danger. Two signal words will be used: DANGER (more severe hazard) and WARNING (less severe).
- Hazard Statements For each category of a hazard class, a standardized statement is used

to describe the hazard.

- Precautionary Statements Each label will contain statements such as, "Only use non-sparking tools" or "Keep container tightly closed and store in cool, wellventilated place."
- Product Identification Every label will contain the proper product identifiers, such as the code and product name.
- Supplier/Manufacturer Identification – Company name, address and emergency phone number should be listed on labels.

Labels: Secondary Containers

- Secondary labeling systems are still permitted
- Must be consistent with the revised HazCom standard
- No conflicting hazard warnings or pictograms.
- May use written materials (e.g., signs, placards, etc.) in lieu of affixing labels to individual stationary process containers.
- Employer can use GHS compliant labels (same as shipping)

| SAMPLE LABEL | |
|---|---|
| CODE Product Name Product Identifi | Hazard Pictodrams |
| Company Name | |
| Keep container tightly closed. Store in a cool, well-ventilated place that is locked. | Signal Word Danger |
| Keep away from heat/sparks/open flame. No smoking. Only use non-sparking tools. Use explosion-proof electrical equipment. Take precautionary measures against static discharge. Ground and bond container and receiving equipment. Do not breathe vapors. Wear protective gloves. | Highly flammable liquid and vapor. May cause liver and kidney damage. Statements |
| Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Dispose of in accordance with local, regional, national, international regulations as specified. | Precautionary Statements |
| In Case of Fire: use dry chemical (BC) or Carbon Dioxide (CO2) fire extinguisher to extinguish. | Supplemental Information Directions for Use |
| First Aid If exposed call Poison Center. If on skin (or hair): Take off immediately any contaminated clothing. Rinse skin with water. | Fill weight: Lot Number: Gross weight: Fill Date: Expiration Date: |

Pictograms

As of June 1, 2015, HCS will require pictograms on labels, which consist of a symbol on a white background framed within a red border. There are nine total (eight regulated by OSHA).
